

CLAIMS

1. An electronic program guide system comprising:

- receiving means for receiving at least one electronic program guide corresponding to a broadcast program;

5 - selecting means for selecting a desired program from said electronic program guide;

- notification means for creating a notification for the program selected from said electronic program guide;

10 - communication means for access to a communications network;

- transmission means for transmitting a notification of the program selected from said electronic program guide to at least one remote electronic program guide system using said communications network; and

15 - reception means for receiving a notification from a remote electronic program guide system.

2. The electronic program guide system as claimed in claim 1, wherein said communication means is a network modem.

3. The electronic program guide system as claimed in claim 1, wherein said reception means further comprises authorization means for determining if a notification received originated within an authorized remote electronic program guide system.

25 4. The electronic program guide system as claimed in claim 1, wherein said transmission means also are arranged to transmit an alert message indicating said notification to an SMS server to be forwarded as an SMS to a mobile handset of

a user of said at least one remote electronic program guide system.

5. The electronic program guide system as claimed in claim 1, wherein said transmission means is arranged to transmit said notification as an electronic mail to said at least one remote electronic program guide system.

6. The electronic program guide system as claimed in claim 1, wherein said notification includes information indicating the program selected from said electronic program guide.

7. The electronic program guide system as claimed in claim 1, wherein said notification includes recording parameters for the program selected from said electronic program guide.

8. The electronic program guide system as claimed in claim 3, wherein said authorization means further are arranged to authorize recording of the program selected from said electronic program guide if a notification received originated within an authorized remote electronic program guide system.

9. The electronic program guide system as claimed in claim 1, wherein said notification includes information indicating the program selected from said electronic program guide and recording parameters for the program selected from said electronic program guide.

10. The electronic program guide system as claimed in claim 1, further comprising means for generating recording instructions to a recording device associated with said electronic program guide system based on said notification.

11. The electronic program guide system as claimed in claim 10, further comprising user input means for obtaining user

00001333-062701

12. The electronic program guide system as claimed in claim 1, wherein said transmission means are arranged to transmit a notification of the program selected from said electronic program guide to a plurality of remote electronic program guide systems.

15

15. The electronic program guide system as claimed in claim 1, wherein said electronic program guide system is incorporated in a mobile handset.

20

18. A method for providing notifications of a program selected from an electronic program guide system comprising the steps of:

- browsing the electronic program guide for identification of a program of interest;

- selecting a desired program from said electronic program guide;

- creating a notification of the program selected from said electronic program guide;

- 5 - transmitting the notification of the program selected from said electronic program guide to at least one remote electronic program guide system.

19. The method as claimed in claim 18, further comprising the step of:

- 10 - determining in the remote electronic program guide system if a notification received originated within an authorized remote electronic program guide system.

20. The method as claimed in claim 18, further comprising the step of:

- 15 - transmitting an alert message indicating said notification to an SMS server to be forwarded as an SMS to a mobile handset of a user of said remote electronic program guide system.

21. The method as claimed in claim 18, further comprising the step of:

- transmitting said notification as an electronic mail to said remote electronic program guide system.

22. The method as claimed in claim 18, further comprising the step of:

- 25 - authorizing recording of the program selected from said electronic program guide if a notification received originated within an authorized remote electronic program guide system.

23. The method as claimed in claim 18, further comprising the step of:

- generating recording instructions to a recording device associated with said electronic program guide system based on said notification.

24. The method as claimed in claim 22, further comprising the step of:

- generating recording instructions to a recording device associated with said electronic program guide system based on said notification.

25. The method as claimed in claim 23, further comprising the step of:

- obtaining user acceptance of said notification before generating the recording instructions.

26. The method as claimed in claim 18, further comprising the step of:

- transmitting a notification of the program selected from said electronic program guide to a plurality of remote electronic program guide systems.

27. A computer program product stored on a computer readable storage medium, comprising computer readable program code means for causing a computer to perform the following steps:

- providing an electronic program guide for identification of a program of interest;

- providing selection options for a desired program from said electronic program guide;

- creating a notification of the program selected from said electronic program guide; and

- obtaining transmission of the notification of the program selected from said electronic program guide to at least one remote electronic program guide system.

28. A computer program product directly loadable into the internal memory of a digital computer comprising software code portions for performing the following steps when said product is run on a computer:

- 10 - providing an electronic program guide for identification of a program of interest;
- providing selection options for a desired program from said electronic program guide;
- creating a notification of the program selected from said
15 electronic program guide; and
- obtaining transmission of the notification of the program selected from said electronic program guide to at least one remote electronic program guide system.
